

1. (original) A patch-containing packaging pouch comprising: a packaging pouch; and a patch, housed within the packaging pouch, in which a pressure-sensitive adhesive layer is formed on one side of a support, wherein

the pressure-sensitive adhesive layer is formed of a pressure-sensitive adhesive composition containing a pressure-sensitive adhesive and bisoprolol or a pharmaceutically acceptable salt thereof, and

relative humidity inside the packaging pouch at 25°C is maintained at 25% or less.

2. (original) The patch-containing packaging pouch according to claim 1, wherein the relative humidity is maintained at 10% or less.

3. (currently amended) The patch-containing packaging pouch according to claim 1 or 2, wherein a desiccant is further housed within the packaging pouch.

4. (original) The patch-containing packaging pouch according to claim 3, wherein the desiccant is a desiccant formed of a substance which physically adsorbs moisture.

5. (currently amended) The patch-containing packaging pouch according to claim 3 or 4, wherein the desiccant is a desiccant formed of a porous substance.

6. (currently amended) The patch-containing packaging pouch according to ~~any one of claims 3 to 5~~, claim 3, wherein the desiccant is a desiccant formed of a porous substance formed of at least one type of material selected from the group comprising a metal oxide, zeolite and a clay mineral.

7. (currently amended) The patch-containing packaging pouch according to ~~any one of claims 1 to 6~~, claim 1, wherein the pressure-sensitive adhesive contains at least one type of compound selected from the group comprising a styrene-isoprene-styrene block copolymer, polyisobutylene and an acrylic polymer.

8. The patch-containing packaging pouch according to ~~any one of claims 1 to 7~~,

claim 1, wherein the packaging pouch has a blocking layer that blocks penetration of moisture.

9. (currently amended) The patch-containing packaging pouch according to ~~any one of claims 1 to 8~~, claim 1, wherein the packaging pouch has layer formed from polyacrylonitrile on the innermost side of said packaging pouch.
